

FULL DESIGN

The most popular of our design services. This is ideal when you want to have an all-inclusive lighting design package for your project. We will be with you throughout the project supporting you on all lighting related matters from the initial concept to site support.

STAGE 1 - FIRST MEETING

The first meeting is all about getting to know the project and taking a full design brief. This also an opportunity to begin building a good working relationships with the client as well as the design and construction teams.

STAGE 3A - LAYOUTS

When the lighting concept has been agreed on, the stage 3A will commence. This will include [lighting layouts](#) drawn in CAD with lighting circuit diagrams.

Full light fitting specification is included at this stage to indicate which products we recommend in order to achieve the lighting scheme.

STAGE 3B - DETAILS

By providing full [LED Schematics](#), [Switching & Loading Schedule](#) and [Setting Out drawings](#) we make sure that all the necessary technical information is available to teams on site to execute the scheme.

This stage also includes all [detail drawings](#) for each structurally different feature lighting item. We will calculate a lighting budget to show the cost of each fitting type.

STAGE 2 - CONCEPT

We will produce high quality [concept mood boards](#), based on your building layouts, to show our ideas on how to bring the space to life with lighting.

Concept layouts will include suggestions for placement of light sources and examples of lighting effects. Initial specification of light fitting types and possible lighting control systems or switching arrangements will be discussed at this point.

STAGE 2 - MEETING

Mood boards and samples of proposed light fittings will be presented in the concept meeting. This meeting will be minuted and the revisions to the concept design will be made accordingly.

STAGE 4 - SITE SUPPORT

We provide ongoing technical support throughout the project. Our expertise is always available to design and construction teams. We can advise on anything lighting related, including fitting locations, wiring and switching information.

STAGE 3B - PRE FIRST FIX MEETING

We meet with electricians, architects and clients to explain the proposed lighting design and layouts. This meeting will be minuted and drawings will be revised as appropriate.

STAGE 4 - PRE SECOND FIX MEETING

This meeting is to ensure that the design has been executed correctly, such as cabling and joinery details prior to second fix.

... making light work
