

WHO WE WORK FOR

We work for home and business owners, architects, developers, designers, integrators or those who recognise the importance of good lighting to the success of their projects and call in our expert help to achieve their desired effects.

...making light work

WHAT WE DO

Re:light designs innovative lighting schemes for a wide range of architectural projects including:

- ▶ traditional and contemporary homes
- ▶ multi-development units
- ▶ offices (including boardrooms, reception and break-out areas)
- ▶ leisure sector (bars, restaurants, hotels and spas)
- ▶ retail units
- ▶ eco-projects
- ▶ energy-efficient design and auditing

RE:LIGHT Information and Services

OUR SERVICES

We offer a full lighting design service so that our clients get the best possible solution in terms of aesthetics, practicality, energy efficiency, cost, maintenance and compliance.

OUR SERVICES INCLUDE

High level lighting concept design

Producing concept boards

Ideas for placement of light sources

Ideas for light fittings and control systems

From the concept design comes the detailed lighting design which consists of:

Luminaire layouts and circuitry in CAD form

Circuit loading and switching schedules

An open specification including luminaire data sheets and detailed pricing information

Design drawings for building works related to lighting details

Detailed light level calculations and computer generated images (CGI) of the space to visualise the proposed lighting scheme where required

Samples & on-site lighting trials

Lighting product procurement

Recommendation and specification of light fittings to suit your scheme

Including management of lead and delivery times to suit your schedule

Bespoke lighting

Design, commission and supply of unique fittings where required

Project management

We work as the link between you and your contractors to implement the scheme

Commissioning of lighting control systems to set scenes

"Great lighting is as much an art as a science that only comes with experience."

Dominic Triggs
Senior Designer
