

# PARTIAL DESIGN

Partial design will be tailored to fit each individual project and based on a fixed fee. When a full design scheme is not required, we offer targeted services and expertise in all areas of lighting.

## CONCEPT & FITTINGS

Concept & Fittings is perfect when separate site drawings are not required for lighting. We will create a lighting concept moodboard with light fitting specification.

## FITTINGS & LAYOUTS

Fittings & Layouts works best when the lighting concept has already been established. At this stage we can provide lighting layouts including wiring circuits and corresponding light fitting specification, ensuring the desired lighting effect is achieved.

# OTHER SERVICES

We offer a variety of other services which do not include any design elements and can be agreed on a fixed fee. These are sometimes included in the full design if appropriate to the particular project.

## FITTINGS & BUDGET

In projects where a lighting scheme and layouts already exist, we can provide the light fitting specification according to the lighting concept. We will ensure the scheme provides sufficient lighting and is aesthetically effective. All fitting quantities will be provided within a budget spreadsheet along with corresponding manufacturer quotes for a streamlined ordering process.

## LIGHTING CALCULATIONS

Whether it is an office that needs to meet the building regulations or a residential dwelling with strict planning restrictions, we can calculate light levels and prepare a detailed lighting report. This will include [rendered images](#) of the final lighting in the space based on a 3D model. The calculations can be made for emergency lighting, energy consumption, cost savings or as part of ecologist's report. Lighting calculations are offered as a standalone service or can be included as part of a design package.

## PROCUREMENT

If required, we offer a procurement service. Costs are based on a fixed fee which can be agreed at the start of the project or at a later point when the procurement of fittings becomes relevant. We work on an open-book basis where all original manufacturer prices are shared with the client for approval before purchase.

... making light work
